

# 3-point Jello Shots

## Ingredients:

- 20 (1.5-ounce) plastic shot glasses
- 1 white paint marker
- 3 cups clear flavored water or soda
- 1 cup vodka
- 1 ounce (4 x 1/4-ounce packages) unflavored gelatin
- 1 cantaloupe
- Melon baller tool
- Basketball backboards printed on cardstock

Using a white paint marker, draw big Xs all around the plastic shot glasses, overlapping the bottom and top of each X to make the basketball net. Print the basketball backboard PDF on cardstock, and cut them out. Be sure to make 2 cuts from the bottom so the backboard can notch onto the edge of the glass. Sprinkle 1 ounce (4 x 1/4-ounce packages) of gelatin over 1 cup of cold vodka. (If you're making alcohol-free shots, use 1 cup of cold flavored water or soda instead.) Let this sit for a few minutes, then mix thoroughly. In a pan, heat 3 cups of clear flavored water or soda until boiling. Pour over the gelatin mixture, and stir for 5 minutes. Place the empty shot glasses in a container, and pour the mixture into each glass. Refrigerate for 2 hours. Using a melon baller tool, make cantaloupe basketballs. Attach the basketball backboards to the glasses, and top each jello shot with a cantaloupe basketball.
